

FACILITIES AVAILABLE IN ENVIRONMENT LAB

1. Atomic Absorption Spectrophotometer

Atomic Absorption Spectrophotometer with Hydride generator and Auto sampler

2. Respirable dust sampler

Specification; With burushless blower and auto voltage stabilizer

3. Flame photometer with compressor

Specifications:- Able to detect Potassium and Sodium

4. UV- VIS Spectrophotometer

Specifications:- Complete control through PC WITH UV win software

5. Stack monitoring kit

Specifications:- Stack temp range ambient to 600 deg C, Thermocouple, Gaseous sampling 0.2 to 0.3 lpm

ENERGY LAB INSTRUMENTS

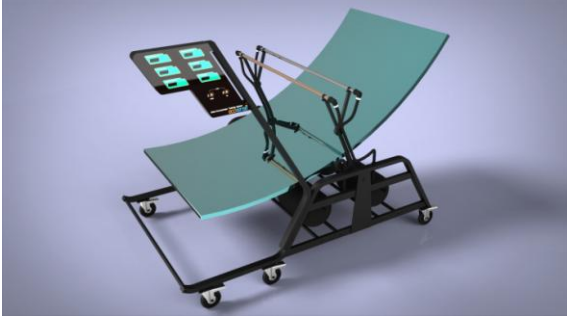

Solar Photovoltaic Training & Research Kit

Solar Thermal Training system

Solar Concentrator Training System

Solar PV Grid Tied Training system

Wind Turbine Emulator
